14-1. Lodging MCCs	26

Overview

Payment brands use merchant category codes (MCCs) to classify merchants and businesses by the type of goods or services provided. Payment brands, issuers and acquirers can use MCCs to categorize, track and restrict transactions. MCCs can be used for tax reporting, interchange promotion and gathering information about cardholder purchasing behavior.

Often, MCCs are recognized by all payment brands; however, not all codes are recognized by all brands. Payment brands frequently add, eliminate or change the codes with regularly-scheduled enhancements.

About This Manual

This manual lists MCCs, the descriptions of the codes, and the payment brand(s) for which the codes are valid. The descriptions can differ slightly between payment brands. The following table has information about the abbreviation used for each payment brand.

Payment Brand	Abbreviation
Visa	V
MasterCard	M
TSYS	TSYS (This code is present on TSYS systems; however, other payment brands may no longer support the code.)

Figure 1-1. Payment Brand Abbreviations

General Merchant Category Codes

MCCs 0001-1499 (Agricultural Services)

The following table includes a list of MCCs in the range 0001-1499 and the description for each code.
